

### Service-Information for air filter when operating the actuator

**Introduction:**

The pneumatically operated actuator of the turbocharger is actuated by the air pressure system of the vehicle and a stroke valve. An air filter is installed in front of the stroke valve – this air filter should be serviced regularly.

**Info:**

Moisture and dirt in the boost pressure control may impair its functionality.

**Instructions:**

When installing a new turbocharger, the filter cartridge „VGT“ has to be exchanged as well. Please check if the stroke valve and the pipe systems are clean operating correctly.

This image is just an example. Please find the part number through the vehicle application.

**Vehicle Manufacturer:** Iveco

**Vehicle:** Cursor 8 / 10 / 13

**Validity:** This service information is valid for renewing the turbocharger with

**BTS reference:** T911363, T914084, T914120

**Manufacturer part no.:** 4033191H, 4033101H, 4033195H
