

Blue Print ADBP300159

To fit:

Honda Civic VIII and Jazz III equipped with i-SHIFT transmission

EN

Clutch Kit

Attention!

When carrying out a clutch replacement on a Honda Civic VIII or Jazz III it is important to check that you have access to a diagnostics tool that can carry out the i-SHIFT System Learning procedure prior to removing the gearbox.

This is essential because if any of the components listed in the table below are removed or replaced and the System Learning procedure is not completed correctly then it will not be possible to drive the vehicle.

	i-SHIFT System Learning (Dynamic Mode)	i-SHIFT System Learning (Static Mode)
Clutch actuator replacement	✓	✗
Transmission shift change actuator replacement	✗	✓
Slave cylinder removal/installation	✗	✓
Clutch friction disc replacement	✓	✗
Pressure plate replacement	✓	✗
Flywheel replacement	✓	✗
Transmission removal/installation	✗	✓
Transmission disassembly/reassembly	✗	✓
