## THREE NEW EGR COOLER MODULES

FOR OVER 8 MILLION AUDI, SEAT, ŠKODA AND VW VEHICLES

**Vehicle coverage:**  
**Over 8 million vehicles**

Motorservice has extended its product range with three new EGR cooler modules. They cover a wide range of Volkswagen AG passenger car models with diesel engines. The new OEM quality products open up a potential market of over 8 million vehicles.

EGR cooler modules combine an EGR valve, cooler and bypass flap in a single component. They are the central component in exhaust gas recirculation (EGR), an important measure to ensure compliance with current exhaust gas limits.
