Opel/Vauxhall (Agila)

Caution, when mounting a HBU 1 bearing with different seals

SKF has several HBU 1 bearings containing a flat metal shield with an integrated rubber seal to be mounted on the inboard side and a double bended metal shield placed on the outboard side.

Note: If not mounted this way, you will decrease the lifetime of the bearing.

VKBA 3571 is packed with mounting instruction MI-542027 to highlight the importance of a visual check of both sides of the bearing before mounting.

Metal shield with integrated rubber seal – inboard side

Double bended metal shield – outboard side
