

**Retaining clip set for
clutch pressure plate
assembly and removal
for front-wheel drive
Vauxhall/Opels**

400 0005 10

Application/vehicle type:

Opel Corsa, Kadett D, Kadett E,
Ascona C, Vectra, Vauxhall Nova, Astra,
Cavalier, Calibra.

Instructions for use:

To remove the clutch pressure plate,
the clutch pedal must be fixed in the
depressed position.

After removing the clutch housing
cover, the three retaining clamps, each
offset by 120 degrees, can be fitted
across the pressure plate lugs and the
clutch cover.

The clutch pressure plate can now be
removed with the help of the ratchet
set 400 0004 10. Before the clutch
pressure plate is fitted, the retaining
clips are to be placed in position using
the clamping device 400 0016 10.
