

Hose Clamp Pliers Set

The universal locking pliers are used to disconnect various cooling water and vacuum hoses. They prevent for example cooling water from escaping or the cooling system from running empty, e.g. when water pumps, thermostats, fittings etc. are replaced. There is no longer any need for laborious ventilation of the cooling system.

- Ergonomic handles for maximum comfort and lever action
- Spring-loaded handles make applying the pliers easier
- Swivelling jaws compensate for the scissor action and enable parallel contact for optimum sealing
- Rounded edges prevent damage to hoses
- Automatic locking and unlocking of the pliers

Material: GRP (Glass fibre Reinforced Plastic)
