

AirGuard

Programming/diagnostics Device, tyre pressure checking sys.

The AirGuard is a programming and diagnostic device. It allows work to be carried out directly on the vehicle whilst offline. The vehicle database, with a coverage of 80-90%, is stored in the device itself. Updates are available free of charge from our website. The AirGuard is able to read out all sensor types found on the market. Then, it is able to automatically or manually duplicate the read data to the Herth+Bus wheel sensors. Programming a new sensor ID is also possible, as well

as the wireless reprogramming of the sensor ID of activated Herth+Bus wheel sensors whilst fitted.

- Read-out of own/third-party sensors according to integrated database
- Programming of Herth+Bus wheel sensors according to integrated database
- free updates
- vehicle coverage of 80-90%
- vehicle data directly on the device

Screen diagonal: 3,5 Inch
Display: with LCD colour display

Info: with charger
with micro USB connector
with OBD cable
